Delete method. Ohh OK get up look at this \*\*\*\*. I literally just paste in an empty text box space OK? IMG or some incompatible file format or whatever and then that's it and then that saves that ship i just thought it physically i physically just thought that ship and that's gone let's say that's how digital footprints work public digital footprint Video film 2 let's try this out notification deleted this is another method i'm using a link that i literally just deleted and i copied the ship that i deleted so there's not no there's always a paper trail

Notification deleted.
