Second to Main Trader, Allocation. No MDD, 20 Sortino Fixed Income Port Cry...

2m • Edited • 🌐

Why did Claude model not start off warming run-time at exact 'top-K', **\*\*NOT\*\*** approximation as your actual root cause of erring model outputs, TPU's vs. CPU's, which is why I assume your Sonnet model(s) were going in circles (based on left public comments)
